CC0/twarezak/Pixabay One of the most satisfying things you can do is create something for yourself or home. Sewing is one of the best ways to make something with fabric. Whether you're designing and making clothes or creating draperies or other items for the home, you can sew your own outfits and decor easily. Sewing allows you to produce custom creations and even save money. It doesn't matter if you're a beginner or expert; you can find used sewing machines online for any budget. Here are some tips on how to find a good used sewing machine online. Find Sewing Machine Retailers Online You might be surprised by how many retailers sell sewing machines online. And so many of these online stores have pre-owned machines in stock at just about every price point. You can find sewing machines that perform the basic tasks and ones that perform astonishingly advanced functions. Many retailers have refurbished their machines and back their used products with limited warranties or certifications, while some sales are final. Ask questions before you commit to buying them. Some of the machines you find online come with extra accessories, while with others, what you see in the listing is what you get. Craigslist Is a Good Local Option If you want to look at something locally, Craigslist may be your best online option. The vast majority of Craigslist entries include photos and detailed descriptions, and you can ask questions of sellers before you agree to purchase. Some sellers are even willing to barter or trade with you for a used sewing machine. Know that you're buying most anything as-is on Craigslist. It's also important to protect yourself when visiting a seller. You should never agree to meet a seller alone or in a private place. Meet the seller in a public area — even a local police station — and take a friend or family member with you. When you're buying from Craigslist, it's always better to be safe than sorry. You Can Find a Machine on eBay Don't forget about eBay when you're looking for used sewing machines online. The auction website offers used sewing machines that you can bid on, some that you can make offers for and some that sell at fixed prices. The possibilities are endless — you can find everything from inexpensive, basic machines all the way up to advanced, pricey equipment. You can search by brand or price point, and you can narrow down your search in several ways. One of the nice things about eBay is that the site offers buyer protection so that you're not at a loss if you're not satisfied or if something happens to the machine in transit. Look for Other Online Auctions or Estate Sales Sometimes you can find a good used sewing machine through an auction house or estate sale. These can be local, or they may be located far away from you. Often in these cases, these items have only had one owner or the owner has taken good care of them. If you can view these items online, you can virtually inspect what you're interested in before you commit to purchasing it. As in every case, feel free to ask questions, and never commit unless you're completely comfortable with what you're buying. In most cases, these items are sold as-is with no guarantees or warranties. Facebook Interest Groups and Sale Pages Are Worth Looking At These days, you can find just about anything you're looking for on Facebook — and that includes used sewing machines. Get involved in sewing interest groups. Not only will you learn something new, get to share your knowledge and make friends, but you also may discover friends who have used sewing machines for sale. You might even find something you're interested in through yard sale groups. The nice thing about these groups is that most of them are local to you, so you may find a used sewing machine that you can pick up close to home. Look carefully at what people are offering before you buy it, because chances are you're buying as-is. MORE FROM QUESTIONSANSWERED.NET \$5.95 This is a download manual. Repair costs can eat up your savings if a used sewing machine won't stitch properly. Machines for Different Types of Sewing The type of sewing you plan to do affects the type of used sewing machine that's going to perform best for you. If you're new to sewing and want a machine to learn on, look at older machines made of metal with metal inner workings, such as older Singer sewing machines. Metal sewing machines typically stand up better to the kind of abuse a new sewing artist dishes out. If you plan to do advanced sewing or designer-level garment making, newer machines typically perform more functions, but they're made of plastic and have plastic inner workings that break easily. Consider Saying No to Rust A sewing machine is a precision household tool. What appears to only be a small amount of rust can be enough to do a lot of damage to a used sewing machine. Corrosion can even cause a sewing machine to completely seize up. Unless you're looking at a valuable vintage machine, consider passing on the purchase if you see rust on the machine. If you do buy a machine that has some rust, coat the rusty area with stainless oil and let it soak in before trying to use the machine to avoid damaging it by forcing it to run while covered in rust. Turn the Balance Wheel The balance wheel is the knob on the sewing machine head that spins when the machine is working. To initially inspect the machine, you don't want it to spin fast. Unthread the needle. Turn the balance wheel toward the front of the machine, moving it slowly by hand. This lets you see if the needle goes up and down properly. It should turn smoothly and shouldn't catch. Raise the presser foot lever and watch under the presser foot to make sure the feed dogs are moving properly. Finally, open the cover over the bobbin and watch to see if the case around the bobbin is turning. Extra Features to Consider While older metal models typically make one or two different stitches, a straight stitch and a zigzag stitch, newer plastic sewing machines may make numerous different types of stitches, such as embroidery designs and stretch stitches. Newer machines that make a variety of stitch styles provide designing potential, but it's at the cost of a machine that doesn't last as long. Inspect it for Missing Parts and Screws It can be hard to find parts for used sewing machines, especially older ones, and everything has to fit together perfectly for a machine to function properly. Look over the machine you're considering carefully to see if all the parts are on it. Check for empty screw holes, and check in the bobbin case to make sure it's all there. If you aren't sure how a bobbin case should look, bring up a picture of a sewing machine bobbin case online before you buy a used machine so you'll know if it looks right. MORE FROM QUESTIONSANSWERED.NET Sewing machine manuals are an invaluable tool when it comes to understanding how to properly use your machine. These books guide the user through each aspect of the sewing machine, which tasks it can perform and how to operate and troubleshoot a particular model of the machine. Sewing machine manuals can often get lost. For those who purchased a sewing machine used, it may not come with a manual. Not to worry, there are a number of ways to replace a lost or damaged manual. Sewing machines companies understand that machine manuals get lost and will usually assist in replacing an original manual for any sewing machine, even one inherited or bought at a yard sale. Each make and model of sewing machines produced around the world is unique in certain ways. As a result, finding the right manual for a machine can be tricky for those who don't know exactly which make and model they have. This is especially true when it comes to older versions. Sewing machine manuals are considered a "part," or an essential piece of equipment to the machine. For those who know the make and model of the sewing machine, it's likely they'll be able to locate a manual. The first step is finding the machine's manufacturer and model number. Most machines have a manufacturer's name somewhere on the machine. The model number may be on the back or bottom of the machine. For those who cannot find a model number anywhere, take a photo of the machine, and try emailing it to the manufacturer's customer service email address for help. Another option is to look at the official company website of your machine and review their database to find a match. Common sewing machine companies include Baby Lock, Bernina USA, Brother Company, Elna USA, Husquavarna Viking, Janome, Pfaff, Riccar, Singer, and White Sewing Machines. While some of these manufacturers have extensive collections of manuals dating back to the start of their companies, others' collections only keep the newest models' manuals in stock and must reprint or source older resources upon request. Shoppers Rule is a website that sells instruction manuals for more than 15 sewing machine brands. If the manual is still in print, they'll receive an original; if not, they'll make a copy. In the rare case that the manual isn't readily available, they'll try to locate one. The sewing machine manufacturer Singer offers manuals for all models at various prices. Simply use their "Consumer Products" section of the website to locate home machine manuals. Meanwhile, the other companies listed above typically have most of the manuals people are looking for on their own websites. Alternatively, try an internet search of the machine's make, model, and the word "Operation Manual" in quotes. If the machine is a popular model, chances are a PDF version will be available for free (or minimal cost) to print and download at home. No matter which option used to replace a specific manual, it shouldn't be too difficult if the machine was made in the last 100 years.
